

THE UNIVERSITY OF TEXAS AT DALLAS
Naveen Jindal School of Management
Executive Education

MS Healthcare Leadership and Management

WHY THIS PROGRAM?

The UT Dallas Executive MS in Healthcare Leadership and Management degree program builds upon your professional experience in healthcare management and administration. You will develop the skills necessary to master strategic planning and executive leadership roles in your organization. With these skills you can make an immediate difference.

Our approach is not based on traditional educational approaches. We flip the classroom by using a case-based curriculum with interactive learnings that is centered around real-life healthcare, administration, and leadership problems. We use each class session to highlight key ideas and best practices. You will learn how to solve problems, not just talk about them, and leave each class with action plans that you can immediately put into action.

The Executive MS in Healthcare Management is a fully accredited degree program offering:

- 36 credit hours of instruction
- Classes meet two days per month on a Friday and Saturday
- Admission is based on academic and professional experience, professional letters of recommendation, and a personal essay.
- No GMAT or GRE is required.

“The greatest benefits of this program have been the perspectives that have been shared by my peers, by the instructors, and all of the above who have really become my friends.”

“I can tell you the great lesson I have learned is to avoid echo chambers. Avoid places where everybody looks and thinks and sounds like me and instead, I found incredible diversity in this program at UTD. People with clinical backgrounds, people early career, later career, rising stars, people who just love learning.”

Jon Doolittle, President & CEO – Missouri Hospital Association

**36 Credit Hours
5 Semesters**
